

ABSTRACT

[0029] A ball joint (12) includes a housing (18) having at least one opening (26) and an inner chamber (28). The ball joint (12) further includes a ball stud (40) disposed in the chamber (28) of the housing (18) and an outer surface (44A). A resilient member (46) is fixedly attached to the outer surface (44A) of said ball stud (40).
